Thema: Job positions at BNA-CBM (Gran Canaria)
Datum: Montag, 8. Februar 2010 12:00:27

Dear List members,

I'm posting information regarding different job positions at the BNA-CBM (National Bank of Algae - Marine Biotechnology Centre) of the University of Las Palmas de G.C. (Canary Islands, Spain).

The BNA-CBM has been recently granted by the Spanish Government through the action "National Strategic Plan for Microalgae" for being consolidated as a Deposit International Authority according to the Budapest Treaty. To go ahead with the planned objectives, BNA-CBM is seeking candidates for the next positions:

4 x Section Curator. Sections are: (1) Cyanobacteria; (2) Chlorophytes; (3) Diatoms; (4) other taxonomical microalgae groups.

The successful candidate for every section will be responsible to coordinate a broad range of research developments related with the collection, isolation, preservation and culture of microalgal strains. The ability to run active research, plan, carry out experiments and prepare accurate reports and scientific publications is required. Supervising PhD, graduate/undergraduate students will be included in the duty. It is supposed that at this level, personnel will be able to generate funding, ideas and relationships with other scientific groups, research centers and companies or industries.

Qualification: PhD in the area of phycology or closely related field.

Knowledge and experience in the systematics of algae is desirable but not required.

English is required.

Salary Benefits (full costs): 35,000 € + 10,000 € according to productivity

Posted opened on: 5th of february - 2010

Closing Date: Until position is filled

Send application, including curriculum vitae, your experience and qualities for the position, names and contact information of two references to:

info@banconacionaldealgas.org

1 x Coordinator for the Molecular Taxonomy Unit

We are looking for a dynamic research leader in molecular biology to develop a new laboratory unit of Molecular Taxonomy at the BNA-CBM. Motivated candidates should provide experience in laboratory molecular biology techniques. The ability to run active research, plan, carry out experiments and prepare accurate reports and scientific publications is required. Supervising PhD, graduate/undergraduate students will be included in the duty. It is supposed that at this level, personnel will be able to generate funding, ideas and relationships with other scientific groups, research centers and companies or industries.

Qualification: PhD in the area of molecular biology or closely related field.

English is required.

Salary Benefits (full costs): 35,000 € + 10,000 € according to productivity

Posted opened on: 5th of february - 2010

Closing Date: Until position is filled

Send application, including curriculum vitae, your experience and qualities for the position, names and contact information of two references to:

info@banconacionaldealgas.org

1 x Project Manager

The successful motivated candidate will be responsible to coordinate actions related to the organization and development of the Project; management of the new built up facilities, equipment and materials investment, supervision of personel and productivity, web improvement, promotion, administration, scientific and management reports, customers relationships, national/international search of funding, organization of related activities (courses and seminars).

Qualification: Leadership and management capacities; fluent english required; computer skills (Omniplan, Microoft Project or similar); knowledge of biotechnology, bio-prospection and bioactive substances fields and trends.

Salary Benefits (full costs): 35,000 € + 10,000 € according to productivity

Closing Date: Until position is filled

Send application, including curriculum vitae, your experience and qualities for the position, names and contact information of two references to:

info@banconacionaldealgas.org

4 x PhD grants

Successful candidates will carry out a 2-years PhD thesis in the field of collection, isolation, preservation, molecular characterization and culture of microalgal strains, associated to the development of BNA-CBM activities.

Qualification: Phycology-Marine Science and related areas

English is required.

Salary Benefits (full costs): 20,000 € + 5,000 € according to productivity

Posted opened on: 5th of february - 2010

Closing Date: Until position is filled

Send application, including curriculum vitae, your experience and qualities for the position, names and contact information of two references to:

info@banconacionaldealgas.org

All candidates will be hired by the University of Las Palmas de Gran Canaria. Laboratory work will take place at BNA-CBM, University of Las Palmas de G.C. in Taliarte (Telde, Gran Canaria Island). Candidates should be willing to travel as needed for formation/learning activities, field sampling, experiments, and laboratory and data analysis.

At last but not least !. Enthusiasthic and self-motivated persons with capacity to work in a group are encouraged to apply.

Best regards,

Juan Luis Gómez Pinchetti
Grupo de Algología Aplicada / Centro de Biotecnología Marina
Universidad de Las Palmas de Gran Canaria
Muelle de Taliarte s/n, 35214 Telde, Las Palmas
Canary Islands, Spain
