

Invited Speakers:

Elisa Berdalet (ES)
Stephan Bialonski (DE)
David A. Caron (US)
Subhendu Chakraborty (DK)
Kevin Flynn (UK)
Patricia Glibert (US)
Per Juel Hansen (DK)
Uwe John (DE)
Raphael Kudela (US)
Iván Pérez-Santos (CL)
Urban Tillmann (DE)
Dedmer van de Waal (NL)
Oliver Zielinski (DE)

Registration and further information:

Deadline for registration:

October 31, 2017

Venue:

Hanse-Wissenschaftskolleg (HWK) Delmenhorst and
ICBM Wilhelmshaven (Site of University Oldenburg)
Germany

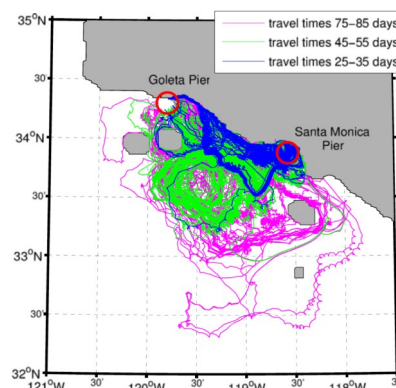

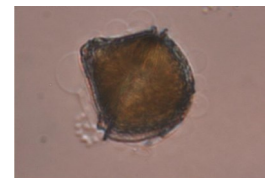

unifying insights from lab experiments, field monitoring and modeling

International Workshop

November 28 - December 1, 2017

Delmenhorst and Wilhelmshaven

The goal of this workshop is to bring together scientists from various disciplines of natural sciences that investigate harmful algae either in the field (generating observational data from HAB monitoring), in the laboratory (experimental data) and in biological and hydrodynamic models coupling population dynamics and transport. We expect a cross-fertilization of different fields and the initiation of joint interdisciplinary work among the participants.
