

Microbiological Colloquium

WS 2013/2014

17:15 h, ICBM Lecture Room W15-1-146

(Extra date: Room W15-0-023, at 8.30 a.m.)

- 24.10.13 **Torsten Thomas**, University of New South Wales, Australia
Functions and interactions in the complex symbiosis between sponges and microorganisms
& **Suhelen Egan**, University of New South Wales, Australia
Marine Bioactives: from discovery to ecological responses
(Host: M. Simon)
- 30.10.13 **Matthias Wietz**, ICBM
CRISPR modules in the actinomycete *Salinispora* illuminate phage-bacteria interactions in tropical marine sediments
(Host: M. Simon)
- 13.11.13 **Bernd Wemheuer**, Universität Göttingen
Metagenomics and Next Generation Sequencing - from Sequence to Ecology
(Host: B. Engelen)
- 27.11.13 **Marwan Majzoub**, University of New South Wales, Australia
Biofilm formation and dispersal of the seaweed associated bacterium *Phaeobacter gallaeciensis* 2.10
(Host: M. Simon)
- 11.12.13 **Alexander Loy**, Universität Wien
Go with the flow: Endospores of thermophilic bacteria as tracers of microbial dispersal by ocean currents
(Host: J. Niggemann)
- 08.01.14 **Ralf Conrad**
Microbial methane production and desiccation stress
(Host: H. Cypionka)
- 22.01.14

Guests are welcome!

Heribert Cypionka
