

Microbiological Colloquium

Time: 17:15 h, Room: ICBM W15-1-146

- 14.10.15 **Verena Salman, ICBM**
"A world of giants – exploring the ecophysiology of large sulfide-oxidizing bacteria"
(host: Heribert Cypionka)
- 28.10.15 **Niculina Musat, UFZ Leipzig**
"Linking microbial identity and function of single cells – a nanoSIMS approach"
(host: Cristina Moraru)
- 11.11.15 **Michaela Salcher, Czech Academy of Sciences**
"Pelagic freshwater methylophiles - why isolates are important to get a holistic picture of their ecology"
(host: Meinhard Simon)
- 25.11.15 **Kate Duncan, Scottish Marine Institute**
"Marine microbial metabolomics – addressing big picture questions in the comparative –omics era"
(host: Matthias Wietz)
- 09.12.15 **Sarahi Garcia, University of Uppsala**
"The power of mixed cultures as model communities: Auxotrophy, intra-population complementary and genetic structure in freshwater. "
(host: Meinhard Simon)
- 13.01.16. **Andreas Teske, University of North Carolina**
"Microbes living on fossil hydrocarbons: hot, cold and anthropogenic examples"
(host: Meinhard Simon)
- 27.01.16 **Amelia Rotaru, Aarhus University**
"A new DIET for methanogens"
(host: Cristina Moraru)

Guests are cordially invited!

T. Brinkhoff et al.
