

Geochemisches Seminar WS 2011-2012

Di 17 - 19 Uhr, ICBM, W15-1-146

01.11.2011	Peter Clift (guest, AG Brumsack): Evolving isotopic fluxes to Asian marginal seas controlled by Monsoon strength since the Last Glacial Maximum
08.11.2011	Melanie Beck (AG Brumsack): Biogeochemical dynamics in pore waters of a wave-impacted intertidal sand beach.
15.11.2011	Swaantje Müllenmeister & Christian Kramer (Bachelor students, AG Dittmar): Mikrobiologische Bildung von gelöstem organischen Material – ein Mesokosmen-Experiment.
22.11.2011	Donata Monien (AG Brumsack): Dissolved and particulate matter in Potter Cove, West Antarctic Peninsula.
29.11.2011	Tatjana Widmer (Bachelor student, AG Brumsack): Geochemische Charakterisierung des Partikuläres Materials in und um die Potter Cove, King George Island, Subantarktis
06.12.2011	Jutta Niggemann (AG Dittmar): Geo-metabolomics – a novel concept for understanding function and reactivity of dissolved organic matter.
13.12.2011	Philipp Böning (AG Brumsack): Water column source of Ni for geoporphorines?
20.12.2011	Huafang Jin (PhD student, AG Liebezeit): Distribution of total mercury in peat soil profiles in Southern Oldenburger Moorland, Northern Germany.
10.01.2012	Hannelore Waska (AG Dittmar): tba
17.01.2012	Michael Seidel (AG Dittmar): Processing of dissolved organic matter in permeable sediments of the coastal North Sea.
24.01.2012	Tanja Badewien (PhD student, AG Rullkötter): Alkanes in a record of continental margin sediments, Namibia.
31.01.2012	Annika Kroning (Master student, AG Brumsack): Optimization of a method for quantification of dissolved metals in seawater.
07.02.2012	Jürgen Köster or guest scientist (AG Rullkötter): tba
14.02.2012	Henning Fröllje (Master student, AG Brumsack): Trace metals as indicators for redox conditions and freshly deposited organic matter in upwelling sediments.

Gäste sind wie immer herzlich willkommen!
