

Microbiological Colloquium

WS 2016

17:15 h, ICBM Lecture Room W15-1-146

- 26.10.16 **Rebecca Case**, University of Alberta, Canada
Bioactive molecules shape the ecology and evolution of *Emiliana huxleyi* and its microbiome
(Host: Thorsten Brinkhoff)
- 02.11.16 **Florin Musat**, Helmholtz-Zentrum für Umweltforschung
Thermophilic archaea activate butane by alkyl-CoM formation
(Host: Cristina Moraru)
- 16.11.16 **Stefan Braun**, Aarhus University
Microbial life deep beneath the oceans
Insights into size, biomass, and activity of microorganisms in the deep biosphere
(Host: Heribert Cypionka)
- 30.11.16 **Burak Avci**, MPI-Bremen
Ecophysiology of recurrent bacteria thriving during North Sea spring phytoplankton blooms
(Host: Meinhard Simon)
- 14.12.16 **Alexa Garin-Fernandez**, AWI-Helgoland
"Temperate Phages of potentially pathogenic *Vibrio* species from the North Sea"
(Host: Cristina Moraru)
- 11.01.17 **Ulrich Nübel**, Leibniz-Institut DSMZ
Spatial Spread of Microorganisms
(Host: Bert Engelen)
- 25.01.17 **Janin Sameith**, BAM in Berlin
Microbially induced corrosion – Influence of biofilm formation and material properties on anaerobic corrosion processes
(Host: Heribert Cypionka)

Guests are welcome!

Cristina Moraru
